PROFILE

Full-stack engineer building and scaling high-availability systems using NestJS, PostgreSQL, and Azure/Terraform. Proven track record of leading cross-functional teams (4+ devs) to bridge the gap between complex business logic and production-ready infrastructure. Recently spearheaded the development of a 'Pay at the Table' ecosystem, overseeing the full SDLC and implementing Auth0/IAM for enterprise-grade security. Expert in database optimization and designing high-throughput APIs, focused on delivering performant, maintainable codebases in fast-paced startup environments.
